TCEQ Interoffice Memorandum

To: Tony Walker

Director, TCEQ Region 4, Dallas/Fort Worth

Alyssa Taylor

Special Assistant to the Regional Director, TCEQ Region 4, Dallas/Fort Worth

From: Shannon Ethridge, M.S., D.A.B.T. S.E.

Toxicology Division, Office of the Executive Director

Date: November 19, 2014

Subject: Toxicological Evaluation of Results from an Ambient Air Sample for Volatile

Organic Compounds Collected Downwind of the Enervest Operating, LLC - Paddack Phillip Facility (Latitude 33.2611, Longitude -97.25219) near Krum,

Denton County, Texas

Sample Collected on September 24, 2014, Request Number 1409020 (Lab Sample

1409020-001)

Key Points

• Reported concentrations of target volatile organic compounds (VOCs) were either not detected or were detected below levels of short-term health and/or welfare concern.

Background

On September 24, 2014, a Texas Commission on Environmental Quality (TCEQ) Region 4 air investigator collected a 30-minute canister sample (Lab Sample 1409020-001) downwind of the Enervest Operating, LLC - Paddack Phillip Facility (Latitude 33.2611, Longitude -97.25219) near Krum, Denton County, Texas. The sample was collected in response to a hand-held VOC device reading. The investigator experienced a light hydrocarbon odor but not health effects while sampling. Meteorological conditions measured at the site or nearest stationary ambient air monitoring site indicated that the ambient temperature was 74.2°F with a relative humidity of 52.5%, and winds were from the east southeast (123°) at 3.9 to 6.4 miles per hour. The sampling site was less than 100 feet from the possible emission source (tanks). The nearest location where the public could have access was approximately 301 to 500 feet from the possible emission source. The sample was sent to the TCEQ laboratory in Austin, Texas, and analyzed for a range of VOCs. The list of the target analytes that were evaluated in this review is provided in Attachment A. The VOC concentrations were reported in parts per billion by volume (ppbv) (Attachment B and Table 1). Please note that the available canister technology and analysis method cannot capture and/or analyze for all chemicals.

Tony Walker et al. Page 2 November 19, 2014

Results and Evaluation

Reported VOC concentrations were compared to TCEQ's short-term health- and/or welfare-based air monitoring comparison values (AMCVs) (Table 1). Short-term AMCVs are guidelines used to evaluate ambient concentrations of a chemical in air and to determine its potential to result in adverse health effects, adverse vegetative effects, or odors. Health AMCVs are set to provide a margin of safety and are set well below levels at which adverse health effects are reported in the scientific literature. If a chemical concentration in ambient air is less than its comparison value, no adverse health effects are expected to occur. If a chemical concentration exceeds its comparison value it does not necessarily mean that adverse effects will occur, but rather that further evaluation is warranted.

All of the 84 VOCs were either not detected or were detected below their respective short-term AMCVs. Exposure to levels of VOCs measured in this sample would not be expected to cause short-term adverse health effects, adverse vegetative effects, or odors.

Please call me at (512) 239-1822 if you have any questions regarding this evaluation.

Qualifier Notes:

- ND not detected
- NQ concentration can not be quantified due to possible interferences or coelutions. SDL Sample Detection Limit (Limit of Detection adjusted for dilutions).
- SQL Sample Quantitation Limit (Limit of Quantitation adjusted for dilution), DNV Invalid.

- J. Reported concentration is below SDL.

 L. Reported concentration is at or above the SDL and is below the lower limit of quantitation.

 E. Reported concentration exceeds the upper limit of instrument calibration.

 M. Result modified from previous result.

- T- Data was not confirmed by a confirmational analysis. Compound and/or results is tentatively identified.

 F Established acceptance criteria was not mot due to factors outside the laboratory's control.
- H Not all associated hold time specifications were met. Data may be biased.

 C Sample received with a missing or broken custody seal.

 R Sample received with a missing or incomplete claim of oustedy.

 I Sample received without a legible unique identifier.

- G Sample received in an improper container.
 U Sample received with insufficient sample volume.
- W Sample recevied with insufficient preservation.

Quality control notes for AP001VOC samples.

- D1-Sample concentration was calculated using a dilution factor of 4.
- D2-Sample concentration was calculated using a dilution factor of 8.

Lab Sample ID	1409020-001						
Compound	Odor AMCV (ppb _v)	Short-Term Health AMCV (ppb _v)	SQL (ppb _v)	Concentrations (ppb _v)	Flags	SDL (ppb _v)	
t-2-Hexene	140	500	2.4	ND	D1	0.54	
t-2-Pentene	Not Available	2,600	2.4	ND	D1	0.54	
Tetrachloroethylene	770	1,000	1.2	0.01	J,D1	0.48	
Toluene	920	4,000	1.2	1.3	D1	0.54	
Trichloroethylene	3,900	100	1.2	ND	D1	0.58	
Trichlorofluoromethane	5,000	10,000	1.2	0.25	J,D1	0.58	
Vinyl Chloride	Not Available	26,000	1.2	ND	D1	0.34	

^{*}A simple asphyxiant displaces air, lowering the partial pressure of oxygen and causing hypoxia at sufficiently high concentrations. ppbv - Parts per billion by volume.

ND - Not detected.

NQ - Concentration can not be quantified due to possible interferences or coelutions.

SDL - Sample Detection Limit (Limit of Detection adjusted for dilution).

SQL – Sample Quantitation Limit (Limit of Quantitation adjusted for dilution).

INV - Invalid.

J - Reported concentration is below SDL.

L - Reported concentration is at or above the SDL and is below the lower limit of quantitation.

E - Reported concentration exceeds the upper limit of instrument calibration.

M - Result modified from previous result.

T - Data was not confirmed by a confirmational analysis. Data is tentatively identified.

F - Established acceptance criteria were not met due to factors outside the laboratory's control.

H – Not all associated hold time specifications were met. Data may be biased.

C - Sample received with a missing or broken custody seal.

R - Sample received with a missing or incomplete chain of custody.

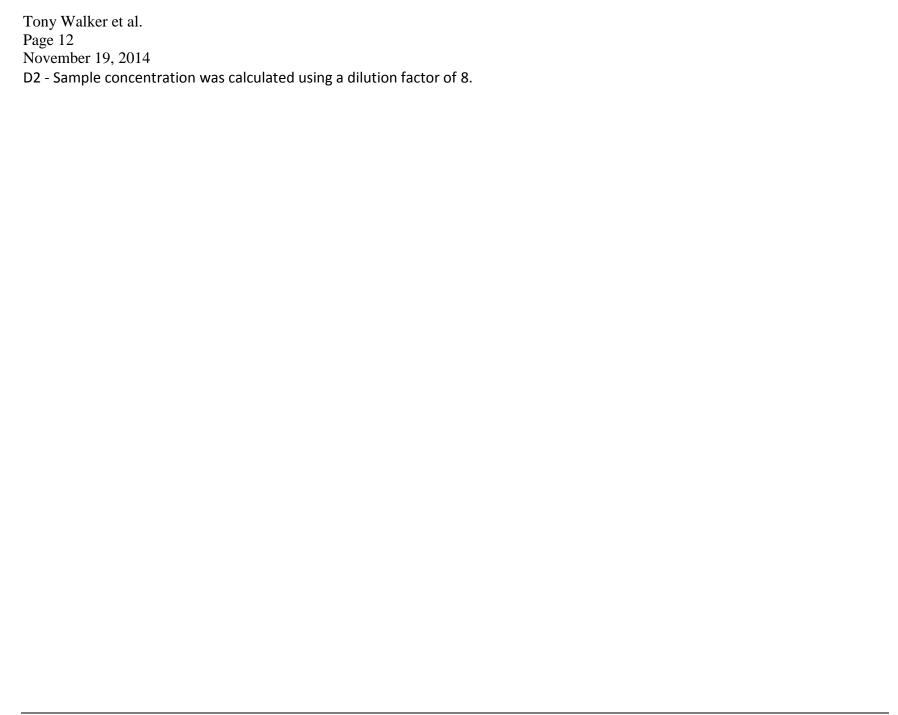

I - Sample received without a legible unique identifier.

G - Sample received in an improper container.

U - Sample received with insufficient sample volume.

W - Sample received with insufficient preservation.

D1 - Sample concentration was calculated using a dilution factor of 4.

Table 2. TCEQ Long-Term Air Monitoring Comparison Values (AMCVs)

Please Note: The long-term AMCVs are provided for informational purposes only because it is scientifically inappropriate to compare short-term monitored values to the long-term AMCV.

Compound Long-Term Health AMCV (ppb _v)		Compound	Long-Term Health AMCV (ppb _v)	
1,1,1-Trichloroethane	940	Cyclopentane	120	
1,1,2,2-Tetrachloroethane	1	Cyclopentene	290	
1,1,2-Trichloroethane	10	Dichlorodifluoromethane	1,000	
1,1-Dichloroethane	100	Ethane	Simple Asphyxiant*	
1,1-Dichloroethylene	86	Ethylbenzene	450	
1,2,3-Trimethylbenzene	25	Ethylene**	5,300	
1,2,4-Trimethylbenzene	25	Isobutane	2,400	
1,2-Dibromoethane	0.05	Isopentane (2-methylbutane)	8,000	
1,2-Dichloroethane	1	Isoprene	2	
1,2-Dichloropropane	10	Isopropylbenzene (cumene)	50	
1,3,5-Trimethylbenzene	25	m & p-Xylene (as mixed isomers)	140	
1,3-Butadiene	9.1	m-Diethylbenzene	46	
1-Butene	2,300	Methyl Chloride (chloromethane)	50	
1-Pentene	Not Available	Methylcyclohexane	400	
2,2,4-Trimethylpentane	75	Methylcyclopentane	75	
2,2-Dimethylbutane (Neohexane)	100	Methylene Chloride (dichloromethane)	100	
2,3,4-Trimethylpentane	75	m-Ethyltoluene	25	
2,3-Dimethylbutane	99	n-Butane	2,400	
2,3-Dimethylpentane	85	n-Decane	175	
2,4-Dimethylpentane	85	n-Heptane	85	
2-Chloropentane (as chloroethane)	24	n-Hexane	190	
2-Methyl-1-Pentene +1-Hexene	50	n-Nonane	200
